Technology

- Enhanced Diagnostic Value
- Maximizing Signal Information
- Low power consumption
- More efficient healthcare

Innovative Image Quality

Solutions to meet every clinical need

The MyLab40 is a compact console system designed to be the ideal solution for interdisciplinary use within the ultrasound department or clinic. A wide selection of optional features, in addition to a complete range of iQProbes, make the MyLab40 truly a full service system without compromising image quality or ease-of-use.

General Imaging

iQProbes

Esote offers a wide choice of probes ranging from phased array to high frequency linear and convex transducers to meet every clinical need and user preference.

appleprobe

The transducer is the first element which connects with the patient's body. It delivers the ultrasound beam and receives the backscattered echo; its technology is extremely important to obtain a high signal to noise ratio, a sharp signal to optimize information regarding spatial, contrast and temporal resolution.

reddot design award
honourable mention 2008

Easy review & Export

MyLab⁴⁰

MyLabDesk

MyLabDesk installs the same software of your MyLab ultrasound system onto a standard PC. With this image management solution you can share your data between your ultrasound system and PC for comfortable reviewing and post-processing.

USB-stick

DVD-burner

Hard-disk

DICOM

MyLabApp

MyLabApp visualizes images and clips on mobile devices for point-of-care reviewing.
